

Welcome to Latrobe Park Angus' 2026 autumn bull sale. This year's bulls are sired by *Musgrave 316 Exclusive*, known for his great muscularity, body shape, and scrotal circumference. He is a standout well-balanced sire, recognised for calving ease and used widely throughout Australia since 2022.

The remainder of our bulls were sired from our very own *Latrobe Park Legend Q300*, portraying strong genetic traits from his father Clunie Range Legend L348. He has been a proven sire within our own breeding program, evident through the number of progenies produced on farm, each of his offspring showing the foundations of what will be a well-structured and productive animal.

We are confident that this year's bulls will perform to the highest of standards, and as always, we will offer a money –back guarantee to our customers if they are not completely satisfied.

Please feel free to contact us for further information and to arrange a time to view our bulls on farm.

Regards

Laurie Baccega
